TRUSTED IN MORE THAN 300 FLEXIBLE WORKSPACE LOCATIONS AROUND THE UK

PURE OFFICES   **Biz** Space   UNIT MANAGEMENT   B BASEPOINT business centres   CITIBASE since 1993   CitySpace.

Here's what our clients are saying..

"I've just never seen anything so easy to use in terms of controlling a 40,000 square foot building with circa 52 business within it. Once dashboard to be able to control everything from their phones, to their WiFi to their VPN connections, it's just really easy to use."

PURE Offices

"We've been using technologywithin for 10 years and have now run their flagship product meshdata out to all 13 of our business centres. The products are intuitive to use, their pricing is economic and the support is brilliant. Knockout, wouldn't go anywhere else!"

Unit Management

technologywithin IT-enable buildings

We provide WiFi, superfast internet and workspace management software to over **15,000 clients** in the flexible workspace, coworking, hospitality and CRE industries in the UK.

We create bespoke solutions for every building, from design through to day-to-day support, allowing operators and landlords to focus on running their business.

Whatever your workspace, our technology is there to enhance your working environment.

We transfer over

36 **terrabytes** of data a day

OR

7.2 million digital photos
9 million songs
4320 hours of HD video

We have connected over

12,000
fibre lines to clients

We have over

15,000
clients using our systems every day
(enough to fill the Royal Albert Hall three times over)

We're here to help you create next generation workspace

Our portfolio is made up of three services, which come together to offer a flexible and future-proof solution:

mojovoice

mojovoice
enables your clients them to manage their communications whether they are in or out of the office and gives you a clear overview and the tools to manage them.

twiinworkspace

twiinworkspace
is the new workspace management platform, billing solution and industry specific CRM from technologywithin - enabling operators to both manage clients seamlessly at every stage of their lifecycle and provide them with online control of their own services.

meshdata

meshdata
offers complete control of your network with flexible technology and commercials, delivering new revenue streams and best-in-class return on investment.

We deliver the technology, so that you can focus on growing your business

We design and build our products at Geek HQ in Hampshire whilst our primary sales office is in central London. We have clients from Aberdeen to Plymouth, so wherever you're based, we have a solution for you. Our clients (many of whom have been with us for over ten years) consider us as part of their team and know our team members by name. Together we provide connectivity and seamless support to them.
