twiindata cowork | Customer Success Story

"We decided to start working with technologywithin as their solution offered not only the flexibility that we were looking for but they were also able to install their services with the minimum of disruption to our clients. We were really pleased with the installation process from technologywithin. Their team were fast, friendly and knowledgeable and made sure the whole installation project ran as smoothly as possible."

Mark Kass, Founder & CEO,
The Hive Enterprise Centre

twiindata cowork is the perfect solution for coworking and small flexspaces with less than 200 desks.

twiindata cowork wifi benefits

Great value - Choose 1Gb bandwidth from just £639* per month, with our special offer.

Easy install - We can install and train your onsite team.

Reliability - **twiin**data cowork uses the same great **twiin**data platform operated by over 350 flexible workspaces across the UK.

Upsell - Manage bandwidth across your clients and upsell dedicated bandwidth to improve the profitability of your space.

Control - Having **twiin**data cowork on site gives you the ability to monitor and manage the performance of internet bandwidth in your coworking space.

Scaleable - A solution that grows with you with easy upgrades to **twiin**data, our 200+ desk solution for larger spaces.

We deliver the technology, so that you can focus on growing your business

We design and build our products at Geek HQ in Hampshire whilst our primary sales office is in central London. We have clients from Aberdeen to Plymouth, so wherever you're based, we have a solution for you. Our clients (many of whom have been with us for over ten years) consider us as part of their team and know our team members by name. Together we provide connectivity and seamless support to them.
