Flexible Workspace & Coworking | **Workspace management platform**

technologywithin.com/twiinworkspace

 **technologywithin**[®]

Grow your workspace with one simple tool, helping you turn leads into sales.

Managing a successful workspace is challenging, with such a variety of different processes, requests and problems to address each day.

Tools that save you time and make operating your space more efficient are a necessity and **twiinworkspace** has been developed to do just that.

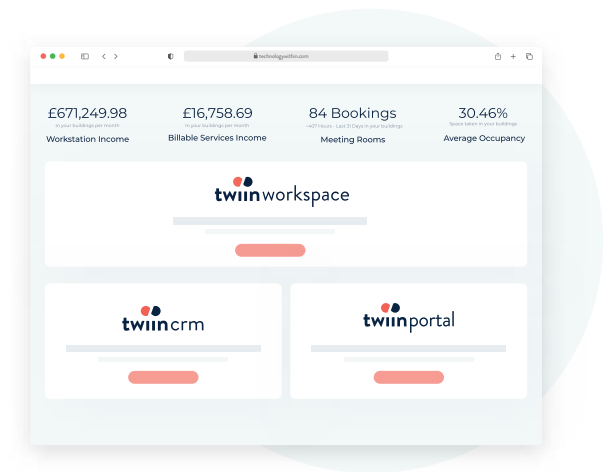

It makes flexspace operators lives easier by offering a simple to use platform to manage day to day duties, common tasks like issuing licences, managing client billing and booking meeting rooms. Make your life easier and your workspace more successful by choosing **twiinworkspace**.

- ✔ Makes managing workspace easier
- ✔ Simple to use for both operators and tenants
- ✔ Saves time

How Does It work?

twiinworkspace is the workspace management platform, billing solution and industry specific CRM from **technologywithin**. Relied upon by operators in the market it enables them to both manage clients seamlessly at every stage of their lifecycle and provide them with online control of their own services.

- ✔ **Tailored** – Easily integrates with your existing systems
- ✔ **Simple** – End to end client management
- ✔ **Professional** – Feature rich end client interface

Clients

twiinworkspace | Customer Success Story

“**twiinworkspace** provided us with an excellent solution. It gives us a powerful tool to manage the flexible workspace at 20Mortlake. We’re able to manage our clients through their lifecycle, with the CRM module assisting in handling prospects and sales leads and turning them into clients. The workspace module then lets us manage those clients within our space.”

**Rob Maybury, Group Financial Controller,
Glenstone Property**

twiinworkspace benefits

Easy to use – A simple and straightforward interface ensures both operators and end users can do the things they need to do, quick and easily.

Integrated – Seamless integration with your accounting systems.

Time saving – All the documents you need in one place, manage licences, contracts and room bookings easily.

Drive revenue – Give brokers real time information on the availability in your space.

Peace of mind – All data is encrypted with a dedicated UK hosted server environment with GDPR compliance by design.

Customisable – Add your own colour palette and logos to personalise your experience.

Completely customisable to suit your workspace

Workspace

The centre of daily operations. Supporting you to manage all aspects of client care with ease. From creating and processing license agreements, to managing renewals, client moves and invoicing. Fully integrated with your banking and accounting systems.

CRM

Home of sales and lead management. Allows you to receive enquiries from all channels, including brokers and manage leads through a simple, visual sales pipeline tool, with the support of real-time availability lists from Workspace.

Client Portal

A simple user interface to empower your customer to take control. Giving them direct access to real-time statements, licence agreements, invoices independently and freeing up your team.

If your office portfolio would benefit from **twiinworkspace**, please contact our Sales team to arrange a chat and a demo.

Technology for successful workspaces

We develop and manage services and software which are perfect tools for operators and landlords to manage their workspaces effectively and profitably. Our solutions are tailor-made for every building, installed and supported by our team of experts and used by over 15,000 clients in the UK.

We have

15k+

companies using our network every single day

We carry over

1 million

minutes of calls on our voice platform every month

We transfer over

36 terrabytes

of data through the **twi**ndata platform every single day

We have

350+

locations using our data management services every single day in the UK

We deliver the technology, so that you can focus on growing your business

We design and build our products at Geek HQ in Hampshire whilst our primary sales office is in central London. We have clients from Aberdeen to Plymouth, so wherever you're based, we have a solution for you. Our clients (many of whom have been with us for over ten years) consider us as part of their team and know our team members by name. Together we provide connectivity and seamless support to them.
